Item 10

SDNP/22/02181/FUL

Further to the Parish Council's previous representation, the Council would like to add these further points:

1. An important policy within the Twyford Neighbourhood Plan namely LHE 1 Protected Gaps. This policy modelled on the Strategic gaps Policy of the City Council adds further considerations to be taken into account when determining this application. You will see from Map 9 in TNP that the whole of both applications fall within the defined Twyford - Colden Common Gap. As far as we can see, no other consultee or objector had drawn your attention to this policy. It is also, we think, the first application since the adoption of the TNP to which this policy applies. It will therefore be a precedent for the treatment of subsequent applications.
2. The impact of Ash die back. The wholesale felling of diseased ash trees is transforming the Twyford landscape by the removal of multiple trees in hedgerows and copses; as a result, what appeared to be settled features of the landscape can no longer be relied on to provide screening. In this case both applications but particularly the eco pods rely on the screening provided by the hedgerows of hare lane and the other hedges to mitigate their visibility from footpaths and other public vantage points. Wintershill Estates as the dominant landowner in this area has commenced its clearing of diseased ash on the land east of the application site and is currently working on the adjacent part of Hare Lane with dramatic results. It must be anticipated that they will move shortly to clear the large ash trees on the lower part of the lane in the interest of public safety for the users of the PROW. Could you please ask your landscape architect to consider the effects of felling on her response to this application. The removal of so many ash which are a dominant tree in this part of the Twyford Landscape has opened up longer views of higher land so making new building on more visible and difficult to screen, particularly on higher land. Please ask your landscape architect to consider this.
3. The application for permanent holiday accommodation on the adjacent land south of B335 very similar development. The two applications have so many similarities that they need to be considered in combination for their cumulative impact. I suggest the potential impacts of the two in combination are in the change in land use character as well as landscape impact. There is the additional requirement for considering in combination effects on the strategic gap for doing so is in LHE 1 (2)

Item 11

Information in an email from WCC:

...the Abatement Notice which was served under Environmental Protection Act 1990, but I can tell you what it says etc. It was served last Friday on the company and requires them to abate the nuisance (noise at ') from the dust abatement plant within 90 days.

The time period is fairly standard for technical noise issues at large industrial premises and means that their Acoustic consultants can do a proper assessment. They can appeal the Notice to a Magistrate's court within 21 days (and in such cases the Magistrates may alter aspects of the Notice). If they don't appeal and don't comply with the Notice they can be prosecuted and fined up to £20,000.

We are expecting early communication as to how they intend to comply with the Notice, but if after the 90 days they haven't done so, we will be assessing whether the noise is causing nuisance still and will consider legal proceedings at that point. Sometimes a company may ask for an extension – we might possibly agree to that but not without reasonable justification e.g. if they were waiting for a part coming from abroad for example....
